PROFESSIONAL EXPERIENCE

WEBSITE MANAGER | AMAZONSELLER CENTRAL

MicroMini | Chennai, Tamil Nadu | Jun 2025 – Aug 2026

- Manage and optimize a WordPress e-commerce website, including product listings, pricing, inventory, and website content.
- Oversee Amazon Seller Flex fulfillment operations and coordinate product-data synchronization across sales platforms.
- Process customer orders and refunds while supporting customer issues and maintaining a smooth post-purchase experience.
- Prepare sales and inventory reports to support business decisions and improve forecasting accuracy.
- Monitor website performance and customer-facing experience, identifying opportunities for website and UX improvements.

FULL-STACK DEVELOPER INTERN

VCodez – Innovating Ideas | 6-month internship

- Built dynamic and responsive frontend features using React.js.
- Developed and tested backend APIs using Node.js and Express to support application user flows.
- Integrated MySQL for data storage and optimized database queries for improved application performance.
- Participated in Agile sprints, daily stand-ups, code reviews, and GitHub-based collaboration.

SELECTED PROJECTS

Restaurant & Food Supply Chain Management Platform — Full-stack web application focused on digitizing restaurant supply-chain operations and sustainability. Built React.js frontend features for inventory management, cart operations, and cost tracking; developed Node.js/MySQL backend APIs; created centralized dashboards for inventory, purchase reports, and sustainability metrics; integrated a Random Forest Classifier for sustainability impact reports; automated delivery scheduling based on sustainability scores; implemented access control and activity monitoring.

ShopEase – React E-commerce Web App — Built a responsive e-commerce frontend using React.js and Vite.js with a modular structure and focus on performance.

Custom Analytics WordPress Plugin — Developed a WordPress plugin to extend website analytics capabilities and customize functionality for business requirements.

Eco-Friendly WordPress Theme — Created a WordPress theme focused on sustainability and energy-saving concepts for eco-conscious businesses.

QuickIQ / SmartQuiz — Developed a responsive web-based quiz application using HTML, CSS, and JavaScript with dynamic questions, countdown timer, scoring, and restart functionality.
